Summary

Innovative and technically-astute android developer well-versed in analyzing user needs and developing software to precisely meet diverse needs. Demonstrates mastery of multiple programming languages and proactively keeps up with industry trends. Driven to wear many programming hats with expertise in creating everything from new applications to new operating systems.

Experience

Waliin App
Android Developer
Rochester, New York, United States
2025-07-20 - 2026-01-02

- **Core Feature Development:** Architected and implemented key social features including **real-time chat**, **multimedia posting**, and **user profiles** using [Kotlin/Java] and the Android SDK.
- **Real-Time Communication:** Integrated and optimized **audio/video calling** and **multi-guest live streaming** (supporting up to 8+1 participants) to ensure low-latency performance.
- **Interactive Features:** Developed the "Game Mode" within live streams, enabling interactive gameplay between hosts and guests.
- **Ad Tech Integration:** Built a custom **points-based advertisement module** that allows users to earn rewards for engagement, collaborating with backend teams to ensure secure transaction tracking.
- **UI/UX Implementation:** Translated complex Figma designs into responsive layouts using **Jetpack Compose** (or XML), focusing on a "TikTok-style" intuitive scrolling experience.
- **Performance & Stability:** Monitored app health using Firebase Crashlytics and optimized memory usage to handle the app's large APK size (70~240 MB) and heavy multimedia processing.

  Achievements
  Performance Optimization: Reduced app launch time by **20%** and decreased crash rates by **75%** through rigorous memory management and code refactoring.
- **Feature Launch:** Spearheaded the development of the **Multi-Guest Live Streaming** feature, which contributed to a **42%** increase in daily user engagement.
- **Scalability:** Optimized the feed's image and video caching logic, resulting in a **34%** reduction in data consumption for users on limited networks.
- **App Growth:** Contributed to the technical roadmap that helped the app reach **10,000+ downloads** with a **4.6-star rating** on the Play Store.
- **Monetization:** Successfully launched the rewarded ad system, driving a **65%** increase in user retention through the points-earning mechanic.

Masjid Timetable
Android Developer
London Area, United Kingdom
2022-03-16 - 2025-05-18

- Handling various technical aspects like designing and development of multiple modules using the given design specifications, debugging and fixing the defects as well as analyzing its root cause.
- Coordinating with and guide the team members for system design, integration, application maintenance, etc.
- Leading teams of around 5 developers to higher levels of project delivery including project management, methodologies, training, mentoring, assessments, and quality reviews.
- Understanding & mapping client’s requirements / enhancements to the product, implementing solutions that effectively resolve problems or provide improvement.

Smart IT Ventures
Android developer
Rupnagar, Punjab, India
2022-12-19 - 2025-04-20

- Google Maps API Integration: Implemented location detection and retrieval in Android applications.
- Front-End Development: Developed responsive UI using Kotlin and Java.
- API Integration: Utilized Retrofit for seamless backend communication and data retrieval.
- Real-Time Chat: Integrated Firebase Database for real-time chat functionality.
- Architecture: Followed MVVM architecture for clean and maintainable code structure.
- Offline Data Sync: Added functionality to sync local data with a remote server when a network is available.
- Studio Management Features: Integrated payment processing, booking systems, and availability calendars to streamline studio operations

BuuPass
Android Developer
Nairobi County, Kenya
2021-10-01 - 2024-12-28

- Maintain and improve upon existing BMS client apps
- Developed a mobile-based ticketing POS system for bus agents, automating the ticketing process and improving transaction speed by 30%, resulting in a smoother customer experience and increased operational efficiency.
- Collaborated with designers and product managers to implement intuitive user interfaces that improved app usability, reducing user drop-off rates by 20% in key app features.
- Optimized the app's codebase by refactoring legacy code, which reduced app crashes by 25% and improved load times by 15%, leading to higher customer satisfaction and fewer support tickets

Achievements

- built a marketplace for bus tickets, flights and train

Africa International University Graduation App
Android Developer
Nairobi County, Kenya
2020-11-30 - 2024-10-30

- developed a graduation app for the university
- Devised documentation for each app, detailing operation aspects, functions, capabilities and features.
- Designed user interfaces that engaged multiple senses and produced immersive experiences.
- Devised techniques for better modularity, testability and maintainability of front-end applications.
- Successfully integrated push notifications into apps, bolstering user engagement.
- Employed JUnit framework to perform unit tests.
- Used third-party libraries, custom libraries and APIs to develop new applications.
- Provided dedicated support and timely issue resolution to clients following successful app launch.
- Created custom mobile applications using native technologies.
- Incorporated offline storage, performance tuning and threading into apps for seamless use.

Dropy
Android developer
Nairobi County, Kenya
2022-01-01 - 2024-08-23

- Developed a high-performing native Android Sales app, replacing the previous web application and reducing bandwidth usage by 80% margin with the ability to work partially offline.
- Designed and integrated Mobile B2B apps (iOS, Android) for sales executives and customers, providing convenience and ease of use for ordering.
- Assisted with the integration of various financial institutions for seamless payment and automatic reconciliation, improving customer satisfaction and retention.
- Provided on-call support and training to non-technical employees on the system's usage, resulting in improved productivity and efficiency in the field.
- Continuously incorporated user feedback to improve app experience and fix bugs, resulting in higher customer satisfaction.
- Implemented Unit Tests to ensure app stability and minimize production bugs.

Upwork
Android Developer
Nairobi County, Kenya
2019-07-26 - 2024-03-15

- Google Play Store Compliance – Ensuring apps follow Play Store policies and guidelines.
- App Deployment & Release Management – Handling app releases, updates, and staged rollouts.
- Google Play Console Management – Managing app listings, reviews, and analytics.
- App Bundle & APK Optimization – Preparing optimized builds for efficient deployment.
- In-App Purchases & Subscriptions – Implementing Google Play Billing system.
- Privacy Policy & Data Security Compliance – Ensuring GDPR and Play Store policy adherence.7.
- App Monetization Strategies – Implementing ads, subscriptions, and in-app purchases.
- Beta Testing & Internal Testing – Setting up closed and open testing tracks.
- App Review & Policy Violation Handling – Resolving Play Store rejections and appeals.
- Performance & Crash Reporting – Using Play Console tools like ANRs, crashes, and pre-launch reports.

Codex Technologies, Ltd.
Android Developer
Nairobi County, Kenya
2020-06-14 - 2022-12-20

- Headlined releases for new features and fixes on the mobile application e.g. Product Catalog and Ordering features, and provided post-release end-user support on bugs.
- Lead & co-ordinated an Android team of 5 Engineers with sprint planning and coming up with road-maps to address technical debt in our codebase.
- Introduced and documented an android cross-team release management strategy to allow seamless non-blocking releases across teams.
- Helped migrate the android codebase from REST to 100% GraphQL.
- Collaborated with different stakeholders e.g. Product Managers, Backend Engineers and QA teams to align priorities to push value for the company product

my Lpgas
Android Developer
Nairobi County, Kenya
2020-05-01 - 2022-05-31

- Leveraging Kotlin for Android application development.
- Utilizing Jetpack Compose for creating dynamic UIs.
- Implementing state management with Jetpack Compose's State and ViewModel.
- Designing and developing custom UI components using Jetpack Compose.
- Writing UI tests to validate Jetpack Compose UI components.
- Ensuring comprehensive test coverage for UI layer.
- Optimizing performance of Jetpack Compose UIs.
- Integrating Jetpack libraries for enhanced functionality.
- Applying the MVVM architecture pattern for scalable and testable code.
- Using Retrofit for networking and managing API integrations.
- Implementing Paging to handle large data sets efficiently
